```
IF $operation = "+" Then
        MsgBox ("", "Maths", "=" & $plus)
EndIF
IF $operation = "-" Then
        MsgBox ("", "Maths", "=", & $minus)
EndIF

IF $operation = "*" Then
     Ma MsgBox ("", "Maths", "=" & $times)
EndIF
```

Automate :

```
Run ("Calc.exe", "")
Sleep (2000)
In WinExists ("Calculator", "") Then
ControlClick ("Calculator", "", 129)
sleep (1000)
ControlClick ("Calculator", "", 92)
sleep (1000)
ControlClick ("Calculator", "", 133)
sleep (1000)
ControlClick ("Calculator", "", 112)
sleep (1000)
```

Conclusion :
~~Control :~~

Thus, we have divide studied and Executed a Program in AutoIt v3 to create & Calculator and automate it using AutoIt v3.
