**Code: Bean.java**

```java
1.  import java.io.Serializable;
2.
3.  public class Bean implements Serializable{
4.      private String name;
5.      private int rollNo;
6.
7.      Bean(){
8.          super();
9.      }
10.
11.     public String getName(){
12.         return this.name;
13.     }
14.
15.     public void setName(String name){
16.         this.name = name;
17.     }
18.
19.     public int getRoll(){
20.         return this.rollNo;
21.     }
22.
23.     public void setRoll(int rollNo){
24.         this.rollNo = rollNo;
25.     }
26.
27.     public static void main(String[] args){
28.         Bean bean = new Bean();
29.         bean.setName("Pratyay Dhond");
30.         bean.setRoll(1907011);
31.
32.         System.out.println("Name    : " + bean.getName());
33.         System.out.println("Roll No : " + bean.getRoll());
34.
35.     }
36. }
```

Output:

```
C:\Windows\System32\cmd.exe
